## FEATURE

### ■ Optimized structure, easy operation

The metal protective cover of battery can be flipped over, which can effectively protect the battery; The battery has simple cover with two combination modes, it can prevent the battery from plugging and unplugging at will.

### ■ New design of plug-in&out battery

The truck uses on-board chargers and it can be charged whenever and wherever you want.

The truck can be equipped with Li-Ion batteries of 30Ah, which can meet different kinds of working condition . Li-ion battery developed by EP is equipped with BMS(battery management system), which is more convenient to use.

### ■ Rigorous design, stable operation

It is equipped with industrial floating universal wheels as standard and offers great passability.

### ■ Reliable drive system

EPL154 adopts the same mature and reliable drive system of EPT20-15ET, and its gradeability can reach 10% even with the load of 1000kg.
